Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1,29,31 (note claim 1 does not claim a sintered body and claims 29,31 reference a sintered body), drawn to a compound.

Group II, claim(s) 2-4, drawn to a sintered titanium compound.

Group III, claim(s) 5-19, drawn to a sintered body of perovskite and whitlockite.

Group IV, claim(s) 10-16, drawn to a process of making a sintered body of a titanium compound.

Group V, claim(s) 17-20,30,32, drawn to a sintered body of a titanium compound and an inorganic substance defined in claim 20.

Group VI, claim(s) 21-28, drawn to a method of making a sintered body of a titanium compound and an inorganic substance.

2. The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

- a. The particulars of the compound listed in Group I is not required in the products recited in groups II,III and V. The particulars of the compound recited in Group I are also not required in the processes in Groups IV and VI.
- b. The sintered body of Group II does not require the particulars of the products of Groups III,V and the processes of Groups IV and VI do not necessarily make the product of Group II.
- c. The processes of Groups IV and VI do not make a product of perovskite and whitlockite required in Group III. The product of Group V does not require the particulars of the product of Group III.
- d. The product of Group V is not necessarily made by the process of group VI as well as the process of group VI does not necessarily make the products of Groups I,II,III and V. The Process of Group IV does not require the inorganic substance of Group VI.

e. It is noted that the inorganic substance of Groups V and VI as defined in the dependent claims is distinct from whitlockite.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship

must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl E. Group whose telephone number is 571-272-1368. The examiner can normally be reached on M-F (6:30-4:00) First Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jerry Lorengo can be reached on 571-272-1233. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
